<h1>Analysis on Electricity Consumption In India</h1>
```

```
<h2>India is the third largest producer of electricity in the world.
During the fiscal year (FY) 2019-20, the total electricity generation in the
country was 1,598 TWh, of which 1,383.5 TWh generated by utilities. The gross
electricity consumption
```

```
per capita in FY2019 was 1,208 kWh. </h2>

        <div class="content">
            <h3>History</h3>
            <p>India began using grid management on a regional
basis in the 1960s. Individual State grids were interconnected to form 5 regional
grids covering mainland India, the Northern, Eastern, Western, North Eastern and
Southern Grids.

            These regional links were established to enable
transmission of surplus electricity between states in each region.

            </p>
            <p>The first interconnection of regional grids was
established in October 1991 when the North Eastern and Eastern grids were
interconnected. The Western Grid was interconnected with these grids in March
2003. The Northern grid

            was also interconnected in August 2006, forming a
Central Grid and operating at one frequency. The Southern Grid, was synchronously
interconnected to the Central Grid on 31 December 2013 with the commissioning of
the 765

            kV Raichur-Solapur transmission line,
establishing the National Grid</p>
